Most used devices/symbols

	V_3phase.asy sources.lib	Three phase voltage source with optional exponential or linear swingin
	Line_special.asy Line.lib	Overhead line and cable uncoupled, transposed
	Line2.asy Line2.lib	Overhead line and cable coupled, transposed, distributed or lumped
	Line2_coupled Line_coupled.lib	Coupled Overhead line lumped, untransposed
	Line_cable_shield.asy Line_coupled.lib	Coupled cabel with shield lumped, untransposed
	Load_d.asy Load.lib	Delta Load R,L,C
	Load_y.asy Load.lib	Wye Load R,L,C
	impedance.asy impedance_sk.asy impedance.lib	Impedance with R,L Impedance with sk (short circuit capacity)
	Lbatt.asy comp.lib	Shunt reactance for voltage regulation
	Cbatt.asy comp.lib	Capacitor bank for voltage regulation
	v/a/p/q/s-meter.asy measure.lib	RMS-Metering devices

	sg.asy sgen.lib	Synchronous generator round pole: Schenkelpolfaktor~1 Kc~0.4-0.65 salient pole: Schenkelpolfaktor~0.5 Kc~0.8-1
	trafo_Yd.asy trafo_Yd.lib	Transformers with different vector groups Yd,Dy,Yy,Yz
	Pet.asy comp.lib	Petersen coil for earth fault compensation
	trafo_gnd.asy trafo_gnd.lib	Artificial external starpoint To use for Yd Dy transformers
	Switcher.asy Switcher.lib	Switcher initially open
	Switcher_off.asy Switcher.lib	Switcher initially closed
	Fault_earth.asy Switcher.lib	Earth fault switcher
	Fault_earth_1phase.asy Switcher.lib	Earth fault switcher one phase
	isolator.asy isolator.lib	Isolator
	bus_veff.asy measure.lib	Bus measurement VRMS L-L phase A,B,C
	bus_veff_phase.asy measure.lib	Bus measurement VRMS L-L,L-N,Phaseangle Phase A
